

### **INTERVIEW SUMMARY**

A telephonic interview was held between Examiner Vanterpool and Attorney Peterson on August 25, 2009 to discuss proposed claim amendments. It was agreed that clarification of the claims to recite the exterior walls and the end faces of the rail and indicate that the support attaches to the exterior walls of the curve and not to the end face of the rails would distinguish the claims over the cited references. The Examiner indicated that his supervisor's schedule did not allow for a joint interview before the Examiner left on leave, and indicated a desire to review the claims with his supervisor. The Examiner also indicated a willingness to further discuss the claims with Counsel before a subsequent office action should any additional clarification is necessary.
